

#### Livermore Area Valley Transportation Authority (LAVTA) Ridership Satisfaction Phone and Online Survey

Summary of Findings

Prepared January 2022

#### Quantum Market Research

### Background

- Overall goal of the study is to gauge rider satisfaction with LAVTA's Wheels Dial-a-Ride service, particularly as a means of tracking opinions over the years.
- In this wave, efforts were made to conduct as many interviews as possible with those who have used the service since April 1, when LAVTA began partnering with neighboring County Connection in a demonstration program to provide the service.
- Survey has been conducted in English over the telephone since 2015.
- Since 2017, interviewing includes online surveys and Spanishlanguage interviewing, in addition to English-language surveys.
- Respondents were users of Wheels Dial-a-Ride service in the previous 12 months or are the caregivers of those users.

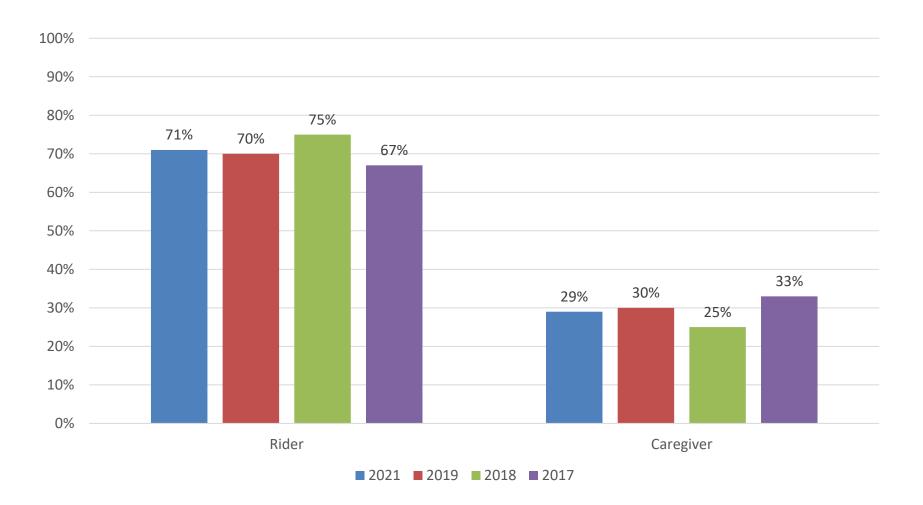

### Methodology

- In 2021, 285 surveys were conducted, including 265 telephone interviews averaging 10 minutes in length.
- Another 19 riders completed the survey online.
- Overall, 181 of the respondents, or 64%, have used the service since April 1.
- The margin of error is just over <u>+</u>5% at the 95% confidence level.
- The sample provided by LAVTA included a total of 1,165 individuals, including 141 at various nursing homes and rehabilitation centers.
- As in the most recent wave, postcards were sent to all riders in individual residences inviting them to complete the survey online or over the phone. Non-respondents with a valid email address also received an email invitation to participate.
- A raffle of four prizes of \$25 was offered to all respondents. Two additional raffles of \$100 were offered to the 255 people who, according to LAVTA, had used the service since April 1.

## Summary of Findings

- Whereas 2019 saw fewer riders accord the highest level of agreement (strongly agree) with the 20 statements, 2021 shows not only an increase over 2019, but increases over 2018 and 2017 as well. Most ratings are at least 10 percentage points higher than last time. This is a welcome change from the softening of opinions seen in 2019. Particularly notable are the number of riders who "strongly agree" that the person on the phone was able to arrange the transportation (+20) and that it was easy to make arrangements on the phone (+19).
- Overall mean ratings saw notable increases when it came to the person on the phone bearing able to arrange the transportation (+.35), hold times not being an issue (+.27), the person on the phone being knowledgeable (+.26), and being easy to make arrangements over the phone (+.24).
- The primary reason for not using Dial-a-Ride since April 2021 is the pandemic, cited as one-third of non-current riders as the reason for their lack of use.
- Once again, the lowest rated statements relate to hold times not being an issue and the driver being on time.
